

Install Fire Station Desktop

Download the Installer

You need *Department Manager* or *Install Fire Station* permissions to install Fire Station Desktop.

The first time you install Fire Station Desktop, you need to download the installer from the Department Hub.

1. On a browser, go to <https://hub.firestationsoftware.com> and sign in.
2. In the left menu click *Install* in the *Fire Station* section.
 - Alternatively, click the "Install" shortcut button in the top bar.
3. Click the "Download Installer" button to download the *Fire Station Setup* installer.
4. Double click the downloaded file to run the *Fire Station Setup* installer and install *Fire Station Desktop*.
5. Sign in with your FSSID to register your device and complete the installation.

The screenshot shows the Department Hub interface. The top navigation bar includes 'Department Hub', 'Invite', and 'Install' buttons. The left sidebar lists navigation options: Home, License, Personnel (Members, Invitations), Fire Station (Install, Devices, Settings), and Fire Station+ (Settings). The main content area is titled 'Hub > Fire Station > Install' and features a 'Fire Station' header with a fire station icon and buttons for 'Download Installer' and 'Email Installer'. Below the header, there are three sections of instructions: 'Before You Begin', 'Installation and Registration', and 'Updating Fire Station', each with a numbered list of steps.

Email a Link to the Installer

You need *Department Manager* permissions to send installation links.

You can send an email with a link to the installation page in the Department Hub.

1. On a browser, go to <https://hub.firestationsoftware.com> and sign in.
2. In the left menu click *Install* in the *Fire Station* section.
 - Alternatively, click the "Install" shortcut button in the top bar.
3. Click the "Email Installer" button.
4. Enter the email address of the person you want to send the installer to.
5. Click the "Send" button.

If the installation link is sent to an email address that is not associated a member of your department, then the link will double as an invitation to join your department. After the recipient accepts the invitation, they will be redirected to the installation page.

Email Installer

Installation and Membership

Only members of your department can install and register Fire Station for your department.

If you send the installer to someone who is not already a member of your department, an invitation will be created, and they will be prompted to create an FSSID and join your department when they click the link.

Additionally, sending this link will grant permission for this member to install and register Fire Station on behalf of your department. You can revoke this permission from the member management screen.
