January 2024

Fire Station+

Rollout Date: January 5th – 11th

Apparatus Checks

General

- Refactored the entire user interface to bring it in line with the Department Hub
- Improved the user experience when running the app on tablet devices

Apparatus Management Layout

- Added layout to view all apparatus in a list and quickly switch between them
- Apparatus check status is visible at all times
- Added per-apparatus settings for days-between-checks to drive the status indicator
- Added menu shortcuts to create new apparatus records

Apparatus Management – Check History Page

- Added new page to view all checks for an apparatus
- A new check can be quickly launched for an apparatus
- A warning appears when a check is currently in progress for the apparatus

Apparatus Management – Checklist Page

- Added new page to configure the apparatus checklist

Apparatus Management – Inventory

- Added a new page to explore the compartment and item configuration for an apparatus
- Added a new page to edit and sort compartments and items

Apparatus Management – Apparatus Details

- Added a new page to edit apparatus details
- A picture of the apparatus can be uploaded and viewed in-app
- Apparatus can now be removed from the app

Apparatus Checks Page

- Streamlined the check process
- Added support for viewing compartment and item photos during checks
- Added better control for editing and deleting all apparatus problems on a single page
- Streamlined the check assignment and participation controls
- If a non-assigned member participates in the check, they will automatically be included on the participation screen
