June 17th, 2026

Personnel Module

With the user permissions, you can now fully manage Personnel through the online web interface.

Training Module

With the user permissions, the Training module online offers flexibility for tracking and documenting training activities.
Now categorize training by location. Example: Online, Classroom, On-Site or Off-site
Record Water/Foam usage for individual training events

Report Integration for Gallons Used and Payroll

Training data is now integrated into the Payroll Report and Water/Foam Usage Report of the Incident Reporting module, giving one central location and a single report to include both incident and training details.
