

# November 25th, 2025

This release adds support for marking attendees at non-emergency events as *Excused* so that they still get credit for attending, but there is a record that they did not attend.

## Non-Emergency Event Attendee Status

To mark an attendee as excused, click the pencil icon next to the attendee's name while entering or updating a non-emergency event:

This opens the attendee details. A new *Status* field has been added. You can select *Excused* or type in any text you wish.

A screenshot of a software interface titled "William Naslund" with a close button (X) in the top right corner. The form has a section for "Hours" with a text input field containing "0:30". Below the "Hours" section is a "Status" section. The "Status" section has a dropdown menu with "Attended" selected and a downward arrow. Below the dropdown menu is the text "Excused". At the bottom right of the form is a "Continue" button with a right-pointing arrow.

Attendees marked as *Excused* will appear with a line through their name. The *Print* page has also been updated to show each attendee's *Status*, if a value has been entered:

**Attendees**

<del>1215 William Naslund</del>	0.50 hours	Excused
